How to Use This Guide

This discussion guide is designed for reading groups, book clubs, and classrooms exploring *Rounds of a Lifetime* by Dr. Victor Y. Wright. The questions are organized into five thematic sections that trace the memoir's arc from childhood through medical school and into a life devoted to medicine.

There is no right order — choose the questions that resonate most with your group, and feel free to spend more time on the themes that spark the richest conversation. A good round of discussion, like a good round of medicine, is less about answers than about attention.

“A calling discovered not in triumph, but in survival — every round, every patient, every scar a verse in the poetry of a life in medicine.”

— from the Prologue

01. Opening the Conversation

- 1.1 The memoir opens with the line about “the first round.” What does the word “round” come to mean across the book — in medicine, and in life?
- 1.2 Before reading, what did you assume a doctor’s memoir would be about? How did this one surprise or challenge that expectation?

02. Childhood & Identity

- 2.1 Dr. Wright writes that “a body can be both a home and a battleground.” Where do you see this tension play out most powerfully in his childhood?
- 2.2 How did the experience of being bullied shape the physician he later became — for better and for worse?
- 2.3 What role does silence play in his early life? Is it a refuge, a weapon, or both?

03. Medical School & Calling

- 3.1 Dr. Wright describes medicine as “a call for survival, not a career choice.” Do you agree that callings can be born from hardship? Have you experienced this?
- 3.2 What does the book reveal about the hidden emotional cost of becoming a doctor that isn’t taught in medical school?
- 3.3 The night he nearly quit is a turning point. What do you think kept him walking forward instead of away?

04. Family & Healing

- 4.1 How does Dr. Wright’s relationship with his family evolve across the memoir? Where do you see forgiveness, and where do you see unresolved weight?
- 4.2 In what ways does healing others become a path to healing himself? Are there limits to that equation?
- 4.3 What does the book suggest about the difference between being cured and being healed?

05. Themes & Takeaways

- 5.1 The heartbeat motif runs through the whole book. What does it symbolize to you by the final chapter?
- 5.2 If you could ask Dr. Wright one question after reading, what would it be?
- 5.3 Who in your life would you most want to read this memoir — and why?

“Every round, a verse in the poetry of a life in medicine.”
